

EconoSnap and EconoCrimp Fascia

Hickman continues our tradition of innovatively designed, rigorously tested roof edge systems with this versatile roof edge fascia system. EconoSnap and EconoCrimp fascia complements your building's natural aesthetics, with no exposed fasteners and features dual attachment points on both the face and roof deck, for added flexibility when accommodating roof irregularities. The clean design is replicated across a variety of roof edges to accommodate multiple roof conditions.

These fascia systems are available for single-ply membrane application with an easy snap-on cover or a crimp-on cover for installers who prefer a more traditional approach.
